<input type="radio"/> Research objectives	
<p style="color: red;">Describe objectives of the research, focusing on following points;</p> <ul style="list-style-type: none"> <li>-What kind of global environmental problems do you address in the research?</li> <li>-How does the research contribute to the solution of such global environmental problems?</li> <li>-What are the research questions this research will aim to answer?</li> </ul>	
<input type="radio"/> Outline of the research	
<p style="color: red;">Describe the outline of the research plan in both Full Research period (5 years) and FS period. Please show how the research is in line with the founding mission and philosophy (basic concepts) of RIHN. Concretely, please demonstrate how the research:</p> <ul style="list-style-type: none"> <li>-is based on the fundamental outlook of RIHN;</li> <li>-contributes to the solution of a specific problem related to global environmental problems;</li> <li>-adopts a cross-cutting, interdisciplinary approach;</li> <li>-will be able to provide to society a coherent story as its research findings and there significance.</li> </ul>	

Method

Describe how the research methodology addresses the study sites and the research objectives.

Expected results

Describe expected results after the completion of Full Research (5-6 years) if the research proceeds to Full Research.

Contribution to Domain-based projects and the RIHN Futurability Initiatives

Please select one or more RIHN Domains (Circulation, Diversity, Resources, Ecohistory, and Ecosophy) and RIHN Futurability Initiatives (Gaia, Oikos and Ethos) to which the project will make a contribution and describe how this contribution will be made.

○ Consistency with requirements of research contents for Institutional Collaboration project

In order to promote global environmental studies contributing to futurability centered on discovering interaction between human and nature promoted by RIHN, please describe how the planned approaches will meet the requirements for Institutional Collaboration projects. (Please refer to the “requirements for Institutional Collaboration projects” as attached separately.)

( 1 ) Use of Resource of the associated institutions.

( 2 ) Use of Resource of the Institute.

( 3 ) Contribution to the establishment of the global environmental studies at the Institute.

○ Consistency with common requirements of research contents for all RIHN projects

(Please refer to the “requirements for Institutional Collaboration projects” as attached separately.)  
Points 4, 5, 6 and 7 will especially be given weights in Institutional Collaboration projects.
